REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claims are allowable over the cited prior arts because said prior arts do not disclose or make obvious a binder resin for a toner wherein the resin having a softening point from 80-165 degrees C, comprises a PAT, such as PET, having a melting point greater than 200 degrees C, and a low molecular weight polyester having a number average molecular weight as claimed. Donjo et al 5,660,963, discloses a toner composition comprising a binder having Tg of 40-90 degrees C and an Mn of 1,000-50,000. The resin comprises a polyester resin (I) having a high softening point of 120-180 degrees, and a low softening point polyester(II) having a softening point of 80-120 degrees. The composition further comprises a long chain carboxylic acid or alcohol both of which are not polyvalent. The two polyesters of the resin are non-linear, and non-PET.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
